DATA SHEET

Tef-Gel™

Anti Seize Assembly Lubricant

The Right Connection®

Tef-Gel™ is a white, extremely high viscosity gel. It is applied to but not limited to fastenings, fittings and electrical connectors in high corrosive environments to ensure protection, serviceability & presentation of assembled hardware. Providing industrial strength protection.

Tube Size (grams)	Part Number
10 G	TEFGEL-10
30 G	TEFGEL-30
60 G	TEFGEL-60
120 G	TEFGEL-120
320 G	TEFGEL-320

Applications
- Fastenings
- Fittings
- Electrical connectors
- Around the home & garden
- Boat & Jetski
- Trailer
- Caravan

Features
- Non-toxic and non-harmful to marine, and land based ecosystems and us
- Non-reactive and chemically stable
- Has an indefinite shelf life and working life
- Contains PTFE (Teflon®) and 0% volatile solvents, no silicones, or petroleum solvents to evaporate
- Will not cold flow or dry out, giving long term protection of hardware for future disassembly
- Industrial grade, non-hazardous, assembly lubricant

How it works
- Prevents corrosion between dissimilar metals
- Galling of all grades of stainless steel
- Act as an assembly lubricant (anti-seize for ease of maintenance)
- Protect electrical connectors from corrosion

Sizes
- 10 gram tube
- 30 gram tube
- 60 gram tub
- 120 gram tube
- 320 gram gun cartridge

Temperature
- Working temperature -60˚ to 280˚C

Approvals
- AS/NZS 4020:2005 potable water certificate

Product Code: AS25
