

63mm Diameter Pressure Gauges

Features:	Water-proof, shock resistant and closed structures are durable and accurate. All series are liquid-filled – Glycerine filled.
Materials:	Stainless steel case. Brass, bourdon tube.
Specifications:	<ul style="list-style-type: none"> • Model: 323 Series. (Crimped On Bezel-CB) • Case: AISI 304 S/S • Type: Pressure Gauge • Nominal Size: 63mm • Tubing: Brass • Movement: Brass • Connection: Brass ¼" BSPT • Pointer Type: General • Accuracy: ± 1.5%F.S. (READ ANSI-B40.1 1985) • Scale: Dual scale PSI and kPa.

• Other varieties of pressure gauges available on request.

100mm Diameter Pressure Gauges

Application:	Light weight, low cost gauge is primarily used in fire protection hydrant assemblies, or where pressure is generally static.
Materials:	Black steel casing, glass face. Brass Bourdon tube.
	<ul style="list-style-type: none"> • Pressure gauges are available with 65mm face, liquid filled and in other configurations. • Other varieties of pressure gauges available on request.
