Hand Held Mining Products

Hard Rock Mining - Rock Hard Products

Minsup's 2 Tonne Scraper Block offers intelligent features such as:

- shielded bearings prohibiting entry of dirt and water;
- snatch principle eliminates reeving;
- 2 tonne forged steel hook;
- suitable for 1/2" or 5/8" SWR.

For use in underground mines, oil fields, constructions sites, timber yards and industrial workshops.

Air Leg "Y" Pieces for the supply of air and water water simultaneously to the air leg rock drill.

Mine Water Valves, or Bendigo Taps, protect air leg rock drills from dirty mine water utilising a filter mesh to ensure tools are protected from foreign matter.

Pelican Pick now with high visibility, shock-proof handle. Will shovel, hoe, scrape, dig trenches and pick. Manufactured from high grade heavy gauge steel plate.

Minsup Air Operated Oil Lubricators protect air leg rock drills and other portable air tools by efficiently oiling the tool mechanism. The oil bottle should not be placed in excess of 3m from tool or machine for correct lubrication. Ensures the oil reaches the machine in mist form.

Other products in the Minsup specialty mining range include

- A complete range of Anfo Loader
- Anfo Loading Hose
- Scaling Bars
- Rock Bolt Wedges
