Dixon Valve & Header Assemblies

E PLASSON minsup

Insist On Dixon Minsup® & Plasson® Fittings

Dixon Valve and Header Assemblies are assembled by trained technicians in our Value Add Centres. We utilise genuine high quality brands to provide safe and reliable assemblies. The assemblies are suitable for all underground service crew applications for 110mm and 63mm poly air and water lines.

Save Time Onsite

Reduce your onsite labour time by using pre-assembled Dixon Header assemblies, providing you a faster install or change over.

Reduce Inventory

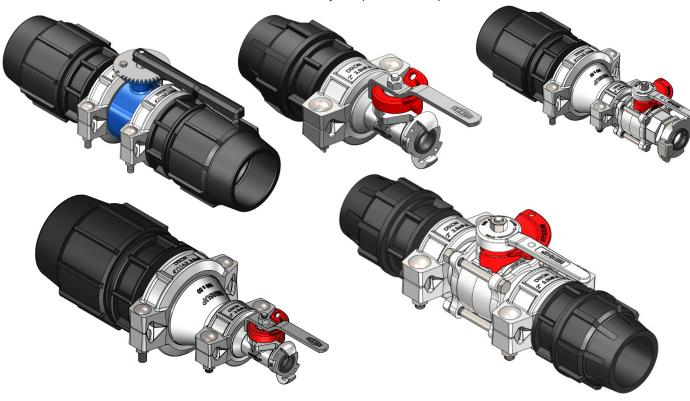

By ordering and stocking our pre-assembled Header Assemblies reduces your requirements to hold excess stock of the multiple components required to build these assemblies on site.

Off The Shelf

Available in five commonly used configurations, pre-assembled on the shelf, ready to dispatch.

Made to Order

Dixon can build and stock custom Header Assemblies to suit your specific site requirements.
