

Minsup Line Strainer

FEATURES

- Available in 1" Female BSP and NPT
- Versatile design enables effortless adaptation to any 1" male fitting including Minsup Surelocks and A – Types
- Removable stainless steel strainer for quick any trouble-free maintenance
- Flow direction instantly identified by embossed arrow
- Zinc plated for corrosion protection

APPLICATION

Designed for use in compressed air systems to eliminate debris reaching expensive air operated tools and equipment. Ideal for industries such as mining and construction where air systems can be subject to high levels of dust and debris.
